

DISTRICT RELATIONSHIPS WITH EXTERNAL/PRIVATE SERVICE PROVIDERS

Observations

Eastmont School District values collaboration with external/private consultants (i.e., ABA Therapists, BCBA Consultants, Private SLPs, OTs, Counselors, etc.) in order to provide appropriate and effective programs to our students. At times, parents may request privately contracted external consultants, or therapists, to observe students in school settings. The District has developed procedures for working with external/private service providers in this manner to the extent that does not interfere with classroom instruction or building operations.

Direct Services

Whenever possible, the Eastmont School District will try to honor requests allowing direct services to be provided to students. The District will work to arrange space in school facilities, excluding classrooms, to the extent that these services do not interfere with building operations or disrupt student learning.
