

## **RECYCLING**

The Eastmont School District recognizes the importance of preserving the earth's finite resources while providing for the efficient operation of the various district programs. The District is committed to a program of conservation with the materials used by the District and to recycling as many of the materials as is feasibly possible. Both students and staff are to be notified of this commitment to conservation and recycling, and to be encouraged to cooperate with this policy. The District will provide the methods and materials necessary to foster the cooperation desired from all staff and students. The input and suggestions from both groups will be solicited in the development of practices to achieve a high level of commitment to this policy.
